THE JOURNAL is the official organ of the ARCHÆOLOGICAL INSTITUTE OF AMERICA, and of the AMERICAN SCHOOL OF CLASSICAL STUDIES AT ATHENS, and it will aim to further the interests for which the Institute and the School were founded. It treats of all branches of Archæology and Art—Oriental, Classical, Early Christian, Mediæval, and American, and is intended to supply a record of the important work done in the field of Archæology, under the following categories: 1. Original Articles; 2. Correspondence from European Archæologists; 3. Archæological News, presenting a careful and ample record of discoveries and investigations in all parts of the world; 4. Reviews of Books; 5. Summaries of the contents of the principal Archæological Periodicals.

Two departments in which the JOURNAL stands quite alone are (1) the *Record of Discoveries*, and (2) the *Summaries of Periodicals*. In the former, a detailed account is given of all discoveries and excavations in every portion of the civilized world, from India to America, especial attention being paid to Greece and Italy. In order to ensure thoroughness in this work, more than sixty periodical publications are consulted and material is secured from special correspondents. In order that readers may know of everything important that appears in periodical literature, a considerable space is given to careful summaries of the papers contained in the principal periodicals that treat of Archæology and the Fine Arts. By these various methods, all important work done is concentrated and made accessible in a convenient but scholarly form, equally suited to the specialist and to the general reader.

It has been the aim of the editors that the JOURNAL, besides giving a survey of the whole field of Archæology, should be international in character, by affording to the leading archæologists of all countries a common medium for the publication of the results of their labors. This object has been in great part attained, as is shown by the list of eminent foreign and American contributors to the five volumes already issued, and by the character of articles and correspondence published. Not only have important contributions to the advance of the science been made in the original articles, but the present condition of research has been brought before our readers in the departments of Correspondence, annual Reviews of various branches (like Numismatics, Biblical Archæology, Greek Epigraphy), and reviews of the more important recent books.

The JOURNAL is published quarterly, and forms, each year, a volume of above 500 pages royal 8vo, illustrated with colored, heliotype, and other plates, and numerous figures. The yearly subscription for America is $5.00: for countries of the Postal Union, 27 francs, 21 shillings, or marks, post-paid. Vol. I. unbound or bound in cloth, containing 489 pages, 11 plates and 16 figures, will be sent post-paid on receipt of $4: Vol. II, containing 521 pages, 14 plates and 46 figures, bound for $5.00, unbound for $4.50: Vol. III, containing 531 pages, 33 plates, and 19 figures; Vol. IV, 550 pages, 20 plates, and 19 figures; and Vol. V, 534 pages, 13 plates, and 55 figures; bound for $5.50, unbound for $5.

All literary communications should be addressed to the Managing Editor, Prof. A. L. FROTHINGHAM, Jr., Ph. D., Princeton College, Princeton, N. J.: all business communications, to the Publishers, GINN & COMPANY, Boston.
